

# ALPHABET CARDS

Support ABC For Life's initiative in supporting intensive literacy intervention for South African children.

Developing phonics skills is fundamental for children to learn how to read. Along with an understanding of phonemes - the individual sounds that make up words - phonics is one of the first core literacy skills that children learn on their reading journey.

Flashcards provide an effective, hands-on and most importantly fun way for children to develop their phonics skills. Phonics flashcards can help children learn the letters of the alphabet and the sounds of combinations of letters. They are a simple and engaging way to introduce and reinforce letter sounds and word recognition skills.
